# DO MORE.

## IN THE MOST CAPABLE

## EXPEDITION EVER.

Hit the ground towing with best-in-class max. 9,300-lb. towing capability<sup>1</sup> in the all-new 2018 Ford Expedition. It all begins with a firm foundation, including a redesigned high-strength steel frame, and an all-new, high-strength, aluminum-alloy body.<sup>2</sup>

### ACCELERATE YOUR ADVENTURES

With 375 hp<sup>3</sup> and 470 lb.-ft. of torque,<sup>3</sup> the twin-turbocharged, port- and direct-fuel-injected 3.5L EcoBoost<sup>®</sup> engine delivers responsive acceleration, and is teamed with a new 10-speed SelectShift<sup>®</sup> automatic transmission. Its wide 7.4:1 gear ratio span helps smooth out the steps between gears – delivering the engine's power consistently for an enjoyable driving experience.

### ENHANCE TOWING CONFIDENCE

Three features of the new 10-speed automatic are particularly useful when towing. SelectShift capability allows you to manually upshift or downshift without using a clutch. Progressive range select mode allows you to lock out the upper gears while towing to help maintain a consistent speed on steep grades. And tow/haul mode features smart shift logic that helps to eliminate unwanted frequent gear shifting on steep uphill grades, while allowing engine braking to help maintain vehicle speed when descending a steep grade with a load in tow.

### BACK UP YOUR TRAILER WITH EASE

Pro Trailer Backup Assist<sup>TM4,5</sup> makes backing up your trailer as easy as turning a knob. While your sideview mirrors are your primary visual aid, Pro Trailer Backup Assist features a rear view camera image to help view trailer direction and determine trailer placement. Simply rotate the knob in the direction you want the trailer to go. The system automatically steers Expedition to turn the trailer the desired amount.

### GET A 360° VIEW

A 360-degree camera with Split-View Display<sup>4,5</sup> features 4 cameras that let you see all sides of the vehicle on the 8" color LCD touchscreen.<sup>4</sup> It works at low speeds in Forward and Reverse.

## COMMAND CONFIDENTLY

## WITH ALL-AROUND ASSISTANCE.

Expedition driver-assist features<sup>1</sup> can help prevent a collision with a vehicle or pedestrian,<sup>2</sup> help keep you centered in your lane,<sup>2</sup> and warn you of vehicles detected in your blind spots.<sup>2</sup> Expedition can even take the hassle out of parking with enhanced active park assist.<sup>1,2</sup> It not only assists you in finding a spot, it steers the vehicle into it while you control the brake, accelerator and rotary gear shift dial. As you pull out of a parallel spot, it provides assistance as well.

### IN TRAFFIC

Adaptive cruise control with stop-and-go<sup>1,2</sup> actively controls acceleration and braking based on the speed you set, automatically adjusting that speed to maintain 1 of 4 preset gaps from the vehicle directly in front of you. The system can be used in both high and low speeds, and can even follow that vehicle to a complete stop.

### WHEN CHANGING LANES

BLIS<sup>®</sup> (Blind Spot Information System) with trailer coverage<sup>1,2,3</sup> warns you if it detects a vehicle in either of your blind spots while driving forward. Optimized for Expedition, the range of BLIS can be programmed and extended to include a conventional trailer. When not towing, cross-traffic alert notifies you of vehicles approaching from the sides while in Reverse.

### WHEN NECESSARY

Pre-Collision Assist with Pedestrian Detection<sup>1,2</sup> can alert you with visible and audible warnings if a potential collision with a vehicle or pedestrian is detected. If the system determines a collision is imminent, active braking may automatically apply the brakes.<sup>4</sup>

### BETWEEN THE LINES

Drifting out of your lane? The Lane-Keeping System<sup>1,2</sup> can help. By applying steering wheel torque, and even alerting you with gentle steering wheel vibrations, it helps direct you to return to your lane.<sup>5</sup> If it detects you've come too close to – or crossed – the lane markers multiple times, a Driver Alert System<sup>1,2</sup> displays a coffee cup icon to suggest taking a break from driving.

#### **ASCEND THE SUMMIT WITH PLATINUM**

You've reached the pinnacle. Up here, 22" polished aluminum wheels command attention. Power-deployable running boards with polished stainless accents extend to give you a lift. An enhanced 3.5L EcoBoost® engine delivers 400 horsepower<sup>1</sup> and 480 lb.-ft. of torque<sup>1</sup>. While a continuously controlled damping (CCD) suspension makes adjustments in milliseconds to help improve vehicle control. Inside, enjoy the most luxurious Expedition. Real wood accents. Perforated inserts and quilted bolsters that define the luxury leather-trimmed, heated and ventilated multicontour front seats with Active Motion®. And every driver-assist technology that Expedition offers is at your service. This is Platinum. Enjoy the view.

## VENTURE OUT WITH CONFIDENCE.

### MAINTAIN YOUR BALANCE

AdvanceTrac® with RSC® (Roll Stability Control™)<sup>1</sup> enhances vehicle stability in a wide range of conditions. By selectively applying individual brakes and modifying engine power, the system helps keep all 4 wheels firmly planted. In addition, Curve Control<sup>1</sup> helps slow you down if you're heading into a curve too quickly.

### ENHANCE YOUR PEACE OF MIND

A suite of 6 standard airbags includes the patented Safety Canopy® System with rollover sensor. If needed, the system can deploy side-curtain airbags along all 3 vehicle rows. The Individual Tire Pressure Monitoring System<sup>2</sup> allows you to check pressure in each tire. You'll be notified if any tire's pressure is low. A numerical value will even tell you how low.

# GO BEYOND PAVEMENT

## WITH FX4.

### GET OUT THERE

And back, thanks to the exceptional off-road capability provided by the Expedition FX4 Off-Road Package.

### TAKE YOUR CROWD AWAY FROM THE CROWDS

With the easy-to-use 4WD with Terrain Management System,<sup>™</sup> you can select from 7 drive modes that help Expedition FX4 adapt to different road conditions. Skid plates help protect the underbody. A patented electronic limited-slip rear differential can vary power output from side-to-side in low-traction off-road situations, depending on which wheels need extra traction. Off-road-tuned front and rear shocks help keep you in contact with solid ground. While all-terrain tires with thick sidewalls deliver the traction needed over rough terrain. Chrome-plated running boards and 18" Magnetic-painted cast-aluminum wheels set you apart on the trails. Hit the ground running in the most off-road capable Expedition ever — FX4.
