NISSAN PATROL

THE NISSAN PATROL

For decade upon decade the Nissan Patrol has etched its way into the Australian psyche, through incredible versatility, capability, performance and an iconic ruggedness that, to this day, remains unparalleled. With such a strong foundation to build upon, the Nissan Patrol brings this off-roading juggernaut into the modern day and beyond, carrying with it not only a reputation but a refinement that has to be experienced to be understood.

Make no mistake; the Nissan Patrol V8 is the most powerful 4x4 in its class*. With modern lines, innovative safety features, Nissan Intelligent Mobility technologies, unimaginable comforts and more, the Nissan Patrol brings sophistication and capability to a whole new level.

NISSAN  INTELLIGENT MOBILITY

*Class refers to Upper Large SUV <\$100k VFACTS Market Segmentation.

Ti-L model in Rich Brown.

NISSAN INTELLIGENT DRIVING OFF-ROAD CAPABILITY

The Nissan Patrol brings with it the technology, design and forethought needed to tackle almost any terrain. For instance the Intelligent 4X4 technology allows the driver to switch between a range of different modes, including sand, on-road, rock and snow with the push of a button. Hill Start Assist and Hill Descent Control systems give the driver the utmost confidence to take the road less travelled. When that road gets that much tougher, the driver can engage the electronic rear differential lock with the push of a button. When it comes to the Nissan Patrol, capability is everything.

4H
Stay on track despite the best efforts of slippery surfaces.

4L
Soft surfaces, mud, steep inclines, the Patrol can do it all.

HILL DESCENT CONTROL
Ensure you command the downhill rather than the other way around with the advanced Hill Descent Control and do it all with the simple push of a button.

REAR DIFFERENTIAL LOCK
The electronic rear diff lock allows you to gain traction in even the toughest conditions with the simple push of a button.

SAND
Tackle sandy conditions with ease and confidence.

SNOW
Snow is no match for the Patrol.

ON ROAD
Get the most out of your on road experience.

ROCK
Adjust throttle characteristics to crawl over rocks with ease.

HYDRAULIC BODY MOTION CONTROL

The Hydraulic Body Motion Control (HBMC) suspension system has been implemented to ensure remarkably low body roll when powering through corners and provides better traction through rough terrain. HBMC plays both the role of shock absorbers and stabiliser bars, allowing for full wheel travel, meaning your wheels will stay firmly on the ground when you're off the beaten track. The HBMC system provides this balance and superior cornering by monitoring force and then distributing pressure to either the outer or inner double wishbone suspension system. This HBMC system delivers a smoother ride, safer cornering and overall enhanced stability.

Ti-L model in Titanium.

POWER AND PERFORMANCE

The Nissan VK56VD 5.6 litre V8 Direct Injection Gasoline (DIG) engine gives the Patrol power to overcome just about anything. The engine features Variable Valve Event and Lift (VVEL) technology and is capable of delivering 298kW of power and an exceptional 560Nm of torque. 3,500kg* of braked towing capacity delivers unrivalled practicality to the driver. A seven-speed automatic transmission ensures that the raw power of this incredible engine is put to good use.

*Towing capacity is subject to towbar/towball capacity and is based on the fitment of a Genuine Nissan towbar. Towing capacity figure described is a maximum figure. Actual towing capacity depends on the laden mass of the vehicle, driving conditions, fitment of any accessories or towing equipment limitations including the maximum towball download.

Ti-L model in Black Obsidian.

TECHNOLOGY TO MAKE LIFE EASY

Reach new destinations as the Nissan Patrol gives you technology you need and more. Technologies that include the practical, the useful, and the almost indulgent. Technologies such as the Satellite Navigation System with 8" colour touch screen, Bluetooth® hands free and audio streaming, 8-inch multi-format screens* in the second row, tri-zone climate control, Intelligent Key® with push button start and remote keyless entry.

8" COLOUR TOUCH SCREEN

With so much information, the 8" colour touch screen with satellite navigation puts everything you need at an arms reach – helping you get to where you're going.

Ti-L model interior *Ti-L model only.

BOSE® PREMIUM AUDIO SYSTEM

Thirteen speakers strategically placed throughout the interior provide a rich sound that upgrades your listening experience. The Bose® premium sound system is custom-tuned by Bose® engineers to take advantage of the unique interior acoustics inside the Nissan Patrol®.

LOOK OUT BELOW

In Reverse, the display helps you see what's directly behind you, while the overhead view helps with smaller objects that might be hidden below your window.

COMPLETE THE PICTURE

Located under your driver's side mirror, this camera helps round-out your virtual 360° bird's eye view, whether you're in Drive or Reverse.

SPARE YOUR WHEELS

In Drive or Reverse, you can push the camera button to switch-out the overhead for a side view. A great help for seeing how close you are to the kerb.

DON'T BUMP YOUR NOSE

In Drive, the display gives you both a front and overhead view, so you know just how far to pull up - without going too far.

INTELLIGENT
AROUND VIEW® MONITOR
360 WAYS TO MAKE
PARKING EASIER
THAN EVER

The Intelligent Around View® Monitor[†] uses four cameras to give you a virtual composite 360° bird's-eye view of your vehicle, with selectable split-screen close ups of the front, rear, and kerbside views, so you can get a better look. Moving Object Detection[†] can detect moving objects near the vehicle, and can give you a visual and audible alert.

Driver's aid only and should not be used as a substitute for safe driving practices. Always monitor your surroundings when driving.

TI-L model shown in Gun Metallic

INTELLIGENT CRUISE CONTROL

With Intelligent Cruise Control^{*} the Nissan Patrol takes the effort out of going with the flow. Instead of sticking to a fixed speed, it senses what the traffic in front is doing and can speed up, or slow down for you.

^{*}TI-L model only. Driver's aid only and should not be used as a substitute for safe driving practices. Always monitor your surroundings when driving.

NISSAN INTELLIGENT DRIVING

EMPOWER YOUR SAFETY IN THE NISSAN PATROL

The Nissan Patrol comes equipped with a huge array of technologies that will ensure your driving safety. Across the range, you'll find technologies like Tyre Pressure Monitoring System, Intelligent Around View Monitor and Hill Descent Control. Plus on the Ti-L, you'll find Intelligent Cruise Control, Intelligent Blind Spot Intervention, Forward Collision Warning, Intelligent Rear View Mirror and Intelligent Lane Intervention.

INTELLIGENT REAR VIEW MIRROR

The Nissan Intelligent Rear View Mirror (I-RVM) has been innovatively designed to help drivers "see around" second and back row interior obstacles, improving visibility and helping maintain a clear view of the conditions and traffic behind them.

FORWARD COLLISION WARNING

On the Nissan Patrol Ti-L model, you'll feel at ease with the Forward Collision Warning system (FCW). Using a front distance sensor, FCW will detect the risk of a forward collision and prompt the driver to brake with an alarm. When the system judges that a collision cannot be prevented, Intelligent Brake Assist (IBA) is activated to help the driver reduce the rear-end collision speed by applying the brakes.

INTELLIGENT BLIND-SPOT INTERVENTION

Smart technology like the innovative Blind Spot Warning and Intervention system detects vehicles in your blind spot and alerts you via an audible alarm. If, for instance you continue to change lanes and the car in your blind spot also continues to proceed, the system will initiate, gently braking one side of the vehicle, bringing your vehicle back to your original lane position, well out of harm's way.

 Standard

Opt

 Optional

Towball download	Vehicle Mass
250kg	GVM (all models)
300kg	Reduce loaded vehicle mass below GVM# by 70kg
325kg	Reduce loaded vehicle mass below GVM# by 100kg
350kg	Reduce loaded vehicle mass below GVM# by 130kg

If the loaded vehicle mass is reduced as shown in the table, the towball download can be increased correspondingly. Accordingly, if the laden mass is 130 kg less than the GVM# a towball download of 350 kg is approved. Different trailer types and different trailer manufacturers have varying towball downloads. The customer will need to contact the trailer manufacturer for information as to the download. Nissan does not recommend the fitting of load levelling or weight distribution devices when used with a Nissan Genuine towbar. When fitted and used correctly, the Nissan Genuine towbar is capable of meeting the towbar/towball capacity stated in the above table.

[†]Figures tested in accordance with ADR81/02 (combined test). Figures stated for the purposes of comparison amongst vehicles only. Actual fuel consumption depends on factors such as traffic conditions, vehicle condition, how you drive and any accessories fitted.
^{*}Leather accented features and upholstery may contain synthetic material.
[#]Towing capacity is subject to towbar/towball capacity and is based on the fitment of a Genuine Nissan towbar. Towing capacity figure described is a maximum figure. Actual towing capacity depends on the laden mass of the vehicle, driving conditions, fitment of any accessories or towing equipment limitations including the maximum towball download.
