

Q70

Infiniti Q70

INFINITI

Inspired Performance

IT'S INSTINCT

GIVE IN TO IT. Be summoned by an audacious beauty that stirs something within. It will lead you to rewards that can only come from engineering and design that satisfy through your senses. In the new Infiniti Q70, you'll discover a different type of flagship luxury that elevates the tactile and celebrates power and dynamic movement. Trust your impulses. They've been waiting for the exceptional.

INFINITI DIRECT RESPONSE HYBRID doesn't require a compromise between efficiency and exhilaration. It pulses with 268 kW delivered with heart-pounding immediacy while achieving up to 6.9l / 100km.

* Figures have been calculated in accordance with ADR81/02. Actual fuel consumption, range and emissions will vary depending on driving conditions, driver behaviour, the condition of your vehicle and the accessories fitted.

INTELLIGENT CRUISE CONTROL (ICC) automatically slows you down when traffic in front of you slows down. When the way is clear, it accelerates back to your desired speed. Less effort, more ease.

DOWNSHIFT REV MATCHING expertly translates performance driving technology. Flick the magnesium paddle shifter for a lower gear and it blips the throttle to ready the engine for the new gear. Smoother, quicker downshifts mean balance and response.

IT'S INSTANT

4WAS (4 WHEEL ACTIVE STEERING)* engages each wheel as you steer. Your Q70 turns in and tracks with clarity and precision to make cornering more immediate, stable and exciting.

* Only available on S Premium.

ACCELERATION SWELL transforms mechanical power into emotional excitement. Precise engine tuning unleashes torque over a broader rev range, and the feeling of acceleration is shaped to increase the faster you go.

Within every movement is a commitment to inspire every moment. Our insatiable drive for an invigorated connection is revealed when your space is a sanctuary and when your fingertips find tools to facilitate your journey. In motion, you will discover dedication.

FOREST AIR® SYSTEM The natural rejuvenation of a cool, soothing breeze is brought into your personal space as you drive. Air is circulated with a gentle ebb and flow.

ADAPTIVE FRONT-LIGHTING SYSTEM (AFS) turns your headlights to shed light on where you're steering. The all-new LED headlights of the Q70 do more than create a response – they respond.

ACTIVE NOISE CONTROL (ANC) seeks to cancel out unwanted noise entering the cabin, so the only thing you hear is silence and the song of performance.

Order above chaos. Preparedness rises over the unexpected. When you are attuned to your environment, you will more confidently move through it.

PREDICTIVE FORWARD COLLISION WARNING (PFCW) scans ahead and detects sudden braking two vehicles ahead to help warn you of potential danger and give you a better chance of avoiding a collision.

FORWARD EMERGENCY BRAKING adds another dimension of safety in the Q70. It detects vehicles ahead in the traveling lane and applies the brakes to prevent collisions as far as possible and to help minimize the severity of any collision.

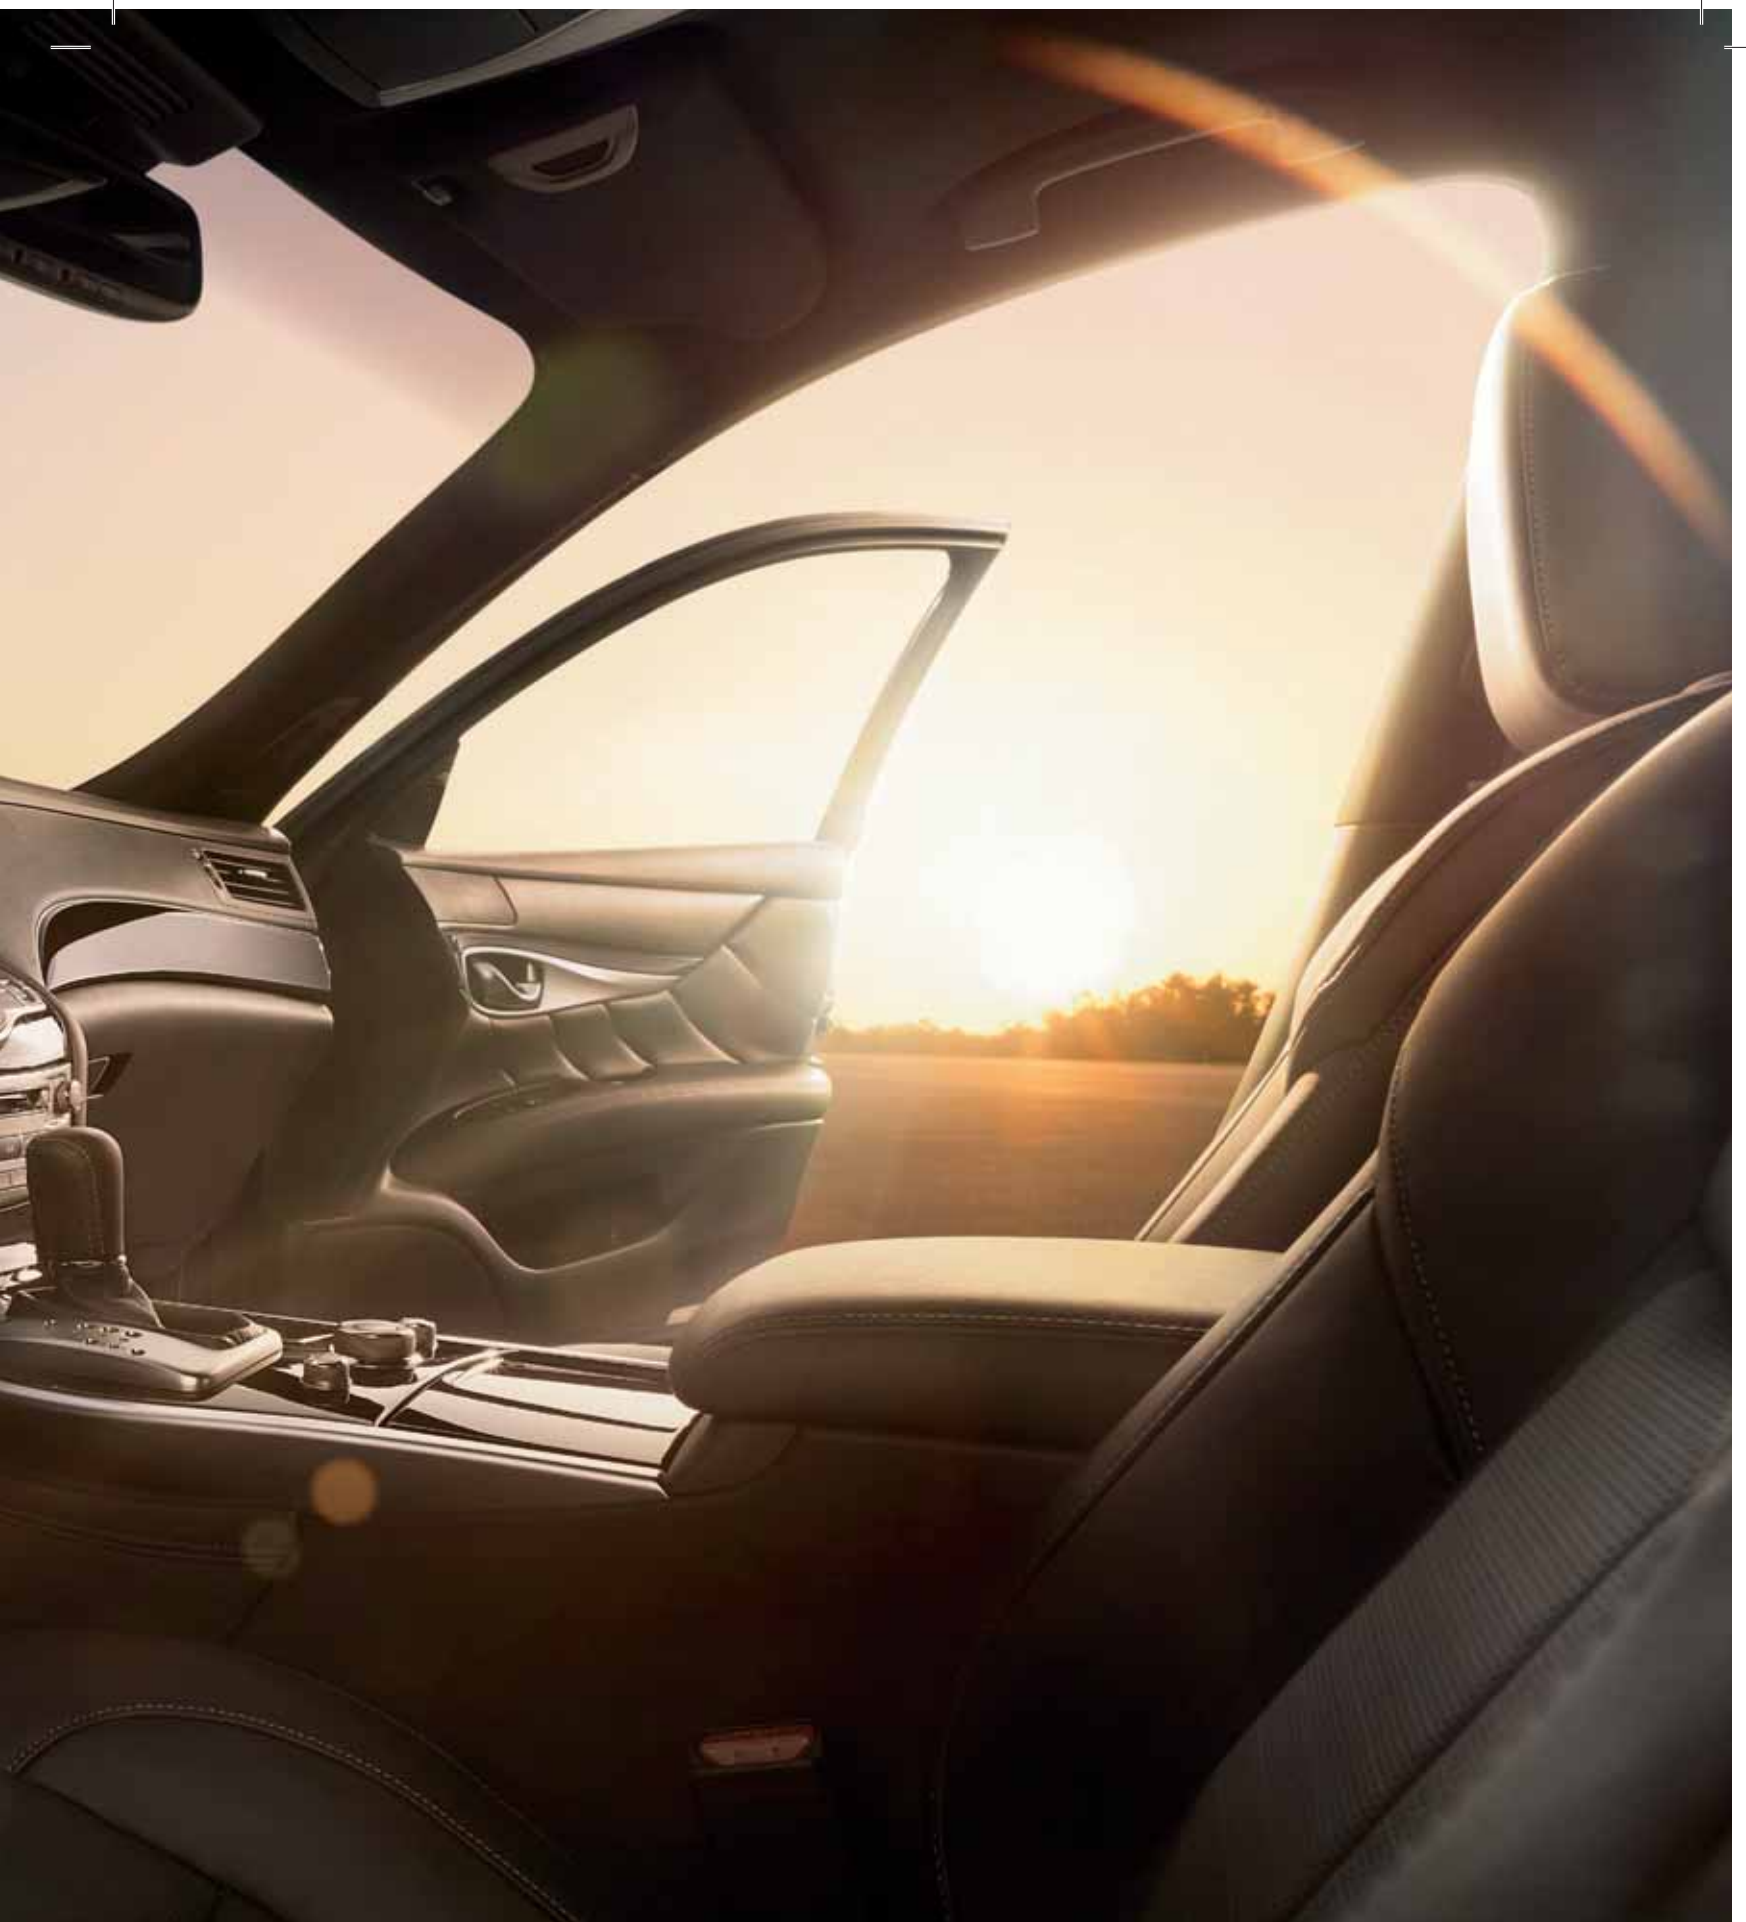

AROUND VIEW MONITOR (AVM) lets you see your surroundings as though from above when parking, for an extraordinary level of awareness.

IT'S POISE

Step out of the routine and reach new heights of potential. Step from the Infiniti Q70 and find you have been moved in new ways. In the richness you touch, the space that surrounds, the sounds that invigorate, you will discover the true reward is the transformation of refinement into rejuvenation.

CLIMATE CONTROLLED SEATS surround you in greater comfort by pushing cool or warm air through the front seats to keep you entirely in your preferred temperature zone. Arrive at your destination refreshed and relaxed.

INFINITI CONTROLLER allows you to command your technology in the manner you find most intuitive. Through buttons, turning ring or touchscreen, it responds to you rather than you conforming to the system.

BOSE® PREMIUM SURROUND SOUND SYSTEM envelops you, creating depth and ambiance for a wider, more immersive sound. Music fills the cabin with soothing richness and thrilling intimacy.

IT'S BOUNDLESS

Is there a more satisfying rarity than the recognition of your desires? Is there a more passionate automotive experience than when luxury recognizes you?

BACKUP COLLISION INTERVENTION (BCI) enhances your awareness and your confidence. It scans the area behind your vehicle while in reverse and can warn you if it detects rear cross-traffic and large stationary objects. It can even brake for you to help you avoid them.

INFINITI INTELLIGENT KEY custom-tailors your Q70 to personalize every drive. Everything from the driver's seat positioning to the outside mirrors and steering wheel settings accommodates to your presence without ever taking it out from your pocket or purse.

WELCOME LIGHTING celebrates every return and elegantly draws you into the driving experience. Upon your approach, a sequence of exterior then interior lights acknowledge your presence. The ignition button will even illuminate with a pulsating glow, to let you know it's ready to please and excite.

OBJECT OF ATTRACTION

The Infiniti Q70

AMBIANCE

A welcoming and evocative space is measured by its ability to stir your emotions.

AUDITORY INDULGENCE Each of the 16 speakers of the Bose® Premium Surround Sound system are custom-tuned for the interior of the Infiniti Q70. Every speaker, including those mounted in the shoulders of the front seats, reproduces sound with legendary Bose® signal processing to create rich and realistic 5.1 surround sound imaging. The system also allows for a wide variety of media sources, including your personal iPod and wireless streaming with a compatible Bluetooth®-enabled device.

FINER FABRICS The seat belt is one of the few surfaces you continually touch, so we found a variable herringbone weave for the webbing that is softer than standard fabrics. Not only is it more pleasing to the touch, but being more compliant, it allowed us to reduce the friction of the seat belt mechanisms. The seat belt is more comfortable to wear, easier to pull out and even less likely to snag the thread of your finest fabrics. We pay close attention to even the finest details.

ABUNDANT SPACE The interior of the Q70 was designed to emphasize both the rewards of spaciousness and the feeling of space. It offers excellent head and hip room for all passengers. Interior elements like the roof and windshield pillars are shaped to give a more open feeling. Each seat is rewardingly supportive and even taller rear passengers will have comfortable legroom. What's more, a wide trunk opening gives you easy access to a spacious luggage compartment.

MATCHLESS MATERIALS The craftsmanship in an Infiniti Q70 is not limited to the exquisite ergonomics and trim. Your fingertips will seem to recognize an instinctively rewarding feel in the armrest and other surfaces. We took one-and-a-half years, surveying 360 people all over the world to ascertain the most pleasing tactile feel. With a tension and texture that match the depth and spacing of the ridges in your fingerprint, the surfaces with which you'll most commonly engage offer the perfect touch.

POWER

Exceptional build quality, fuel efficiency and output can be measured with instruments or graphs, but the true excellence of Infiniti engines is captured in the feeling unleashed as you drive.

HYBRID
268
kW

6.9*
l/100 km

3.5-LITRE V6 WITH INFINITI DIRECT RESPONSE HYBRID The Infiniti Q70 Hybrid is the vehicle that redefined hybrid power. Combining a powerful V6 engine with a 50 kW electric motor gives the system a total of 268 kW. But unlike many hybrids, it transitions from all-electric mode to full-power hybrid mode with thrilling intensity and organic responsiveness. All while achieving a surprising 6.9l/100km.

GT
235
kW

10.2*
l/100 km

3.7-LITRE V6 PETROL ENGINE Its robust design, exceptional power-to weight ratio, advanced technology and fuel efficiency have won it acclaim from critics and fans alike. Benefiting from Variable Valve Event and Lift (VVEL) technology, it adjusts on the fly to make the most of every breath and every drop of fuel, resulting in a stirring 235 kW.

S Premium
235
kW

10.8*
l/100 km

* Figures have been calculated in accordance with ADR81/02. Actual fuel consumption, range and emissions will vary depending on driving conditions, driver behaviour, the condition of your vehicle and the accessories fitted.

PERFORM

Underneath its alluring physique lies the foundation of the thrilling dynamics of Infiniti Direct Response performance engineering.

UNRIVALLED PERFORMANCE Featuring a 1-motor, 2-clutch parallel hybrid powertrain, the Q70 Hybrid is able to go from 0–100 in less than 6 seconds. Masterfully engineered, the high-speed motor control technology enables a seamless transition between the gasoline engine and electric motor, providing a smooth and responsive ride with thrilling acceleration that goes beyond what was thought possible from a hybrid.

EFFICIENT INVIGORATION No hybrid design is quite like it, and none can match its emotional intensity. The 50 kW electric motor and cutting-edge lithium-ion batteries of the Infiniti Direct Response Hybrid are powerful enough to allow you to maintain cruising speed in all-electric mode. When not needed, the 3.5-litre V6 petrol engine is turned off and completely disconnected, maximizing mechanical efficiency. And yet it responds to your call for power with a stirring intensity.

SHARPER SHIFTS When you flick the magnesium paddle shifter (only with sport versions) for a lower gear, Downshift Rev Matching blips the throttle to ready the engine for the new gear. It gives you the power of expert performance driving by delivering smoother downshifts for increased stability and more consistent engine power.

MORE RESPONSIVE BRAKING With ventilated discs and aluminium 4-piston opposed front calipers and 2-piston opposed rear calipers, the available Sport Brakes provide great stopping force from both sides of the rotor at the same time for better bite, more friction and direct feel.

THE SOUND OF PERFORMANCE A performance car speaks to you through its exhaust, and the specialty exhaust tuning on the Q70 shapes that sound into something uniquely compelling. Not only does it make an Infiniti unmistakable, it makes every trip up and down the tachometer an experience that transcends engineering and enters the realm of pure emotion.

INNATELY RESPONSIVE BALANCE The engineering philosophy behind Infiniti performance coupés and sedans, the Front-Midship Platform, also underlies the design of the spacious Infiniti Q70. Placing the engine's centre of mass just behind the front wheel centre line creates a near-equal front-to-rear weight ratio, with a slight front bias that you'll feel as quicker turn-in and even balance as you accelerate out of a corner. Experience precision and engagement you might expect from a sports car.

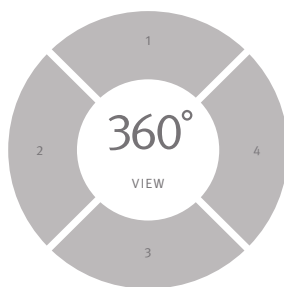

LIGHT ON ITS FEET These stunning 20-inch alloy wheels heighten both the looks and performance of the Q70. Lightweight, thanks to both material and design, they reduce unsprung weight. That reduction of mass renders driving more exciting by allowing the suspension to be more finely tuned and by making the handling of the Q70 more responsive and more nimble.

ASSIST/ENTERTAIN

The advanced technologies of Infiniti InSuite™ simplify tasks and anticipate your needs as they keep you in touch with and in control of your world.

ALL-AROUND AWARENESS The Around View Monitor (AVM) with Moving Object Detection and front and rear parking sensors gives you exceptional awareness of your environment as you park. You'll see a simulated 360° view from above, showing you clearly the objects around your car. And the system will even alert you to moving objects detected in your vicinity. It intuitively puts you in total control, while simultaneously putting you at ease.

CRAFTING TRANQUILITY Active Noise Control (ANC) ensures that the cabin of the Infiniti Q70 offers better solace from the outside world. Intelligent technology uses a microphone in the ceiling to identify undesirable low-frequency engine sounds and neutralizes them with sound waves of the opposite phase. The result is a quieter and more peaceful driving experience which still preserves the more invigorating sounds of engine performance.

A SMARTER WAY TO SEE The Adaptive Front-lighting System (AFS) on the Q70 lights not just the way ahead, but around as well. It directs light toward corners by turning the headlights in coordination with steering input to help the driver see oncoming vehicles and pedestrians, and to help you reach your destination safely.

INFINITI INTELLIGENT KEY automatically custom tailors your car for you. Everything from the driver's seat to your navigation preferences, climate control, audio and performance settings, will be set precisely the way you like it.

SECURING YOUR SPACE Distance Control Assist (DCA) employs a sensor to monitor the vehicle in front of you and helps you maintain a safe following distance. As your following distance becomes too short, the system can automatically engage the brakes as you release the accelerator pedal, and it can warn you if you need to brake. If your foot stays on the accelerator pedal while closing in on the other vehicle, it can push the pedal upwards to assist you in releasing it.

EASE IN TRAFFIC Intelligent Cruise Control (ICC) with Low Speed Following (LSF) allows you to choose your desired speed, and automatically slows your vehicle in slowing traffic, going all the way to a complete stop. Then, as traffic flow picks up, it reaccelerates your vehicle to your preset speed. This visionary innovation and the personalized convenience it offers is available with a simple touch of a button.

EXTEND YOUR AWARENESS Engage reverse and the Rear View Monitor displays the area directly behind. Coloured guidelines help give you an accurate sense of how close you are to objects behind, and they adjust as you turn, to show your path. Also, the front and rear parking sensors emit a beeping tone and display an icon on the Rear View Monitor display when an obstacle appears near the bumpers.

PROTECTION

The Infiniti Safety Shield® concept – our comprehensive approach to safety – layers technologies to monitor conditions, help you avoid a collision, and help protect you and your passengers if one occurs.

1350 MPa
ULTRA-HIGH
TENSILE STEEL

590 MPa
CONVENTIONAL
STEEL

STRONGER AND LIGHTER Ultra high-strength steel is used in areas critical to preserving your safety in the case of a collision. The unique process used to create this material can give it more than twice the tensile strength of conventional steel. Not only does this ultra-strong material add to the vehicle's resiliency, it allows us to make the vehicle lighter overall.

ALWAYS LOOKING FOR DANGER Predictive Forward Collision Warning (FCW) can warn you of a possible collision, even when the cause is outside your field of vision. It uses radar to continuously monitor and analyze the relative speed not only of the vehicle directly ahead of you, but of the vehicle in front of that one as well. If your closing speed on either exceeds safe limits, it provides an alert and tightens the seat belt to help restrain you.

SENSES WHERE YOU CAN'T SEE The Blind Spot Intervention™ System uses sensors to help alert you to a vehicle detected entering the blind spot area in an adjacent lane and helps you avoid it. First, the warning light illuminates. Then, if you begin moving toward the occupied lane, a warning sounds. The system will even apply the brakes on the opposite side to help you guide your vehicle back to the centre of your current driving lane.

MAINTAINING YOUR LANE The Lane Departure Prevention System (LDP) uses a camera to watch for departure from the travelling lane when you haven't signalled, emitting a warning tone if it detects drift. Then, if the drift continues, the system lightly applies selected brakes to help ease your vehicle back into the travel lane. But you never give up control. It's designed to assist, not override.

PREPARED TO PROTECT Forward Emergency Braking scans the area ahead of you, looking for signs that an unavoidable collision might be imminent. If the system detects that deceleration is required, the driver is alerted visually and audibly. The accelerator pedal is pushed up and the brakes are applied to help slow the vehicle down. If there is a possibility of a collision, harder braking is applied and if a collision is unavoidable, the system automatically engages the brakes and tightens the front seat belts to reduce speed and mitigate damage and injury.

REVERSE WITH GREATER CONFIDENCE Backup Collision Intervention (BCI) employs an advanced set of sensors to help detect vehicles approaching from either side as you back up. If a vehicle is detected, the system alerts you – first, a warning light appears, then an audible alarm sounds, followed by feedback via the accelerator pedal force. The system can even intervene by automatically engaging the brakes to help avoid a collision.

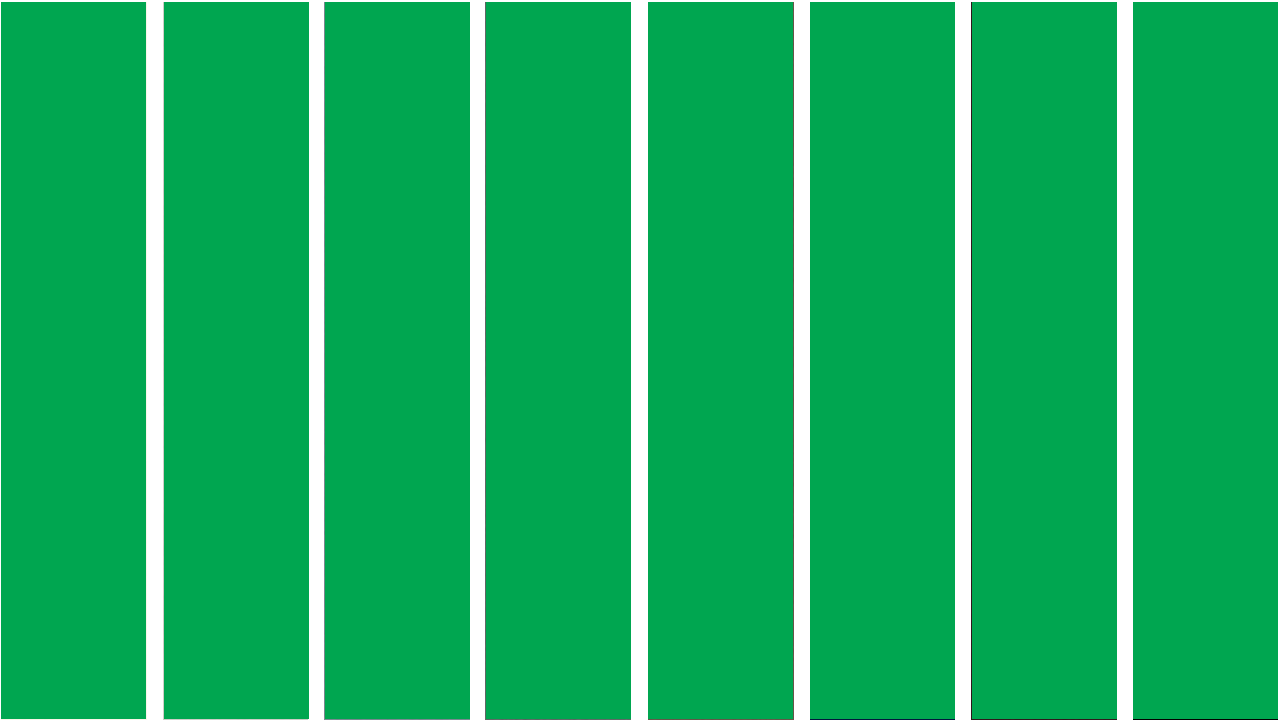

THE SUPPORT YOU NEED In certain rear-end collisions, the Front-seat Active Head Restraints found on the Q70 can move forward to help cushion the head, to assist in reducing whiplash-type injuries.

PREPARED TO PROTECT Under certain braking conditions the Front-seat Pre-Crash Seat Belts automatically tighten the front seat belts – helping to restrain you and helping to maximise the effectiveness of the other occupant protection devices, such as airbags.

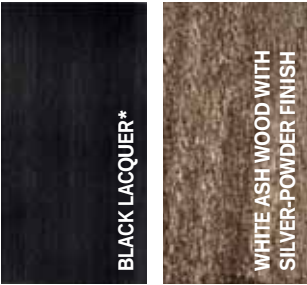

SELECTION

Hues that change in response to light and angle. Matching exterior and interior colours to reflect the distinctive energy and mood of the seasons. These are just a few ways Infiniti uses paint to express feeling, evoke confidence, and shape the emotional essence of a vehicle.

Established in 1989, Infiniti has now grown to include sedans, coupés, convertibles, crossovers and SUVs in its line-up and spans 50 countries worldwide. Infiniti is unique and distinctive – not trying to be all things to all people, but everything to some people. At the heart of the Infiniti brand is a history of human attentiveness where the belief that the total ownership experience is much more important than just the car itself, coupled with a commitment to delivering a more empowering, more assured and more exhilarating driving and ownership experience.

Infiniti has come to be recognised as a brand that delivers expressive and striking car design. A distinctive design crafted by human hand and delivered with a powerful and daring presence on the road. This, combined with an obsessive attention to detail and precision engineering, all contribute to the feeling that to drive an Infiniti is something special.

GENUINE INFINITI ACCESSORIES

The same exacting standards applied to the creation of an Infiniti vehicle go into designing and manufacturing Genuine Infiniti Accessories. With a wide array of quality products designed to integrate seamlessly, you can be assured of a custom fit and finish.

Roof box, loadcarrier.
**Overseas model shown.

TRUNKBOX Collapsible and constructed of a durable and flexible material, the trunkbox helps keep your belongings and other items from moving around while driving, protecting them and your boot from damage and reducing clutter.

REAR SPOILER Custom-designed for perfect fit and factory-matched colour, it enhances your vehicle's sporty, aerodynamic appearance.

TOW BAR Tested to meet the highest demands of safety and functionality, the tow bar is integrated into the car's bodywork and can be removed easily when not needed.

BICYCLE CARRIER The perfectly constructed aluminium cycle carrier is the smartest, most elegant solution for loading and transporting a bike on the roof.

SKI CARRIER For those who love the snow, the practical Infiniti Ski Carriers are a must-have. They connect to your roof bars conveniently and safely, ensuring your gear is easily accessed and ready to go when you reach the top of the mountain.

COAT HANGER Keep your outfit looking as sharp as your vehicle. The optional coat hanger attaches to the driver's seat to hold your evening or office wear, keeping it perfectly crease-free until you arrive at your destination.
