NISSAN INTELLIGENT MOBILITY

Nissan Intelligent Mobility guides everything we do. At Nissan, we use new technologies to transform cars from mere transportation. Together the journey is more confident, connected, and exciting. Whether it is cars that share the task of driving or highways that charge your EV as you go along, it's all in the very near future. And it's a future already taking shape in the Nissan you drive today.

Imagine moving through life with greater confidence, excitement and connection to the world around you. Nissan Intelligent Mobility is shifting the future of driving, and it's already a reality today.

FEEL MORE CONFIDENT

Intelligent Driving It starts now, with technology such as Intelligent Cruise control and Intelligent Lane Intervention that helps you see more, sense more, and takes action to avoid trouble. Nissan ProPILOT will take the next step: navigating heavy traffic and even finding parking. We're already testing autonomous driving on public roads, which means this revolutionary experience is within reach.

FEEL MORE EXCITED

Intelligent Power What if you could have sustainable transportation and a thrilling drive? The emission-free instant acceleration of an electric vehicle makes it possible. With a commitment to electrify and explore alternative energy sources, we're an industry leader bringing clean, quiet power to people worldwide.

FEEL MORE CONNECTED

Intelligent Integration Your Nissan can already connect seamlessly with your smartphone. The next step is smart vehicles that connect with each other to improve safety and traffic flow. And by developing mobile sharing services, we're even redefining what it means to own a car.

The New Nissan LEAF®

SIMPLY AMAZING

A powerful step forward for the Nissan LEAF, the world's best-selling electric vehicle with over 350,000 global sales since 2010.* Get ready for a whole new way to drive, where the everyday is exhilarating. Feel more confident, excited, and connected – wherever you go. All in a car that does simple things amazingly.

*Based on Global EV Sales Data; June 2010 – August 2018.
Nissan LEAF® shown in Two-tone Ivory Pearl with Pearl Black roof. Overseas model shown.

Can even come to a complete stop

Maintains your preset speed and distance

Intelligent Cruise Control

Set it once and go with the flow. With Intelligent Cruise Control, Nissan LEAF® helps out with daily driving - following the car ahead at a preset distance. It can even watch the flow of traffic, as it slows down or speeds up, Nissan LEAF® responds accordingly.

Nissan Intelligent Mobility surrounds you in confidence

You're only human - it's nice to have a little backup when something unexpected happens. The new Nissan LEAF offers a suite of available Nissan Intelligent Mobility features that can step in and take action to help keep you out of trouble.

GET AN ASSIST WHEN YOU NEED IT

Intelligent Emergency Braking with Pedestrian Detection

Monitors your speed and distance between you and the car ahead, and can let you know if you need to slow down. It can even automatically engage the brakes to help avoid a frontal collision or lessen the severity of an impact. And when it detects a pedestrian in the crosswalk, it can stop you in your tracks.

SEE AND SENSE MORE AROUND YOU

Intelligent Around View® Monitor

See more around you with a virtual composite 360° bird's-eye view of your Nissan LEAF. With the push of a button, you can select split-screen close-ups of the front, rear, and curbside views. You'll slide into the tightest spaces and make it look easy, without having to worry about scuffing your wheels.

Rear Cross Traffic Alert

Helps you back out of a space with more confidence. It watches around the rear of your Nissan LEAF, and can warn you about cars it detects creeping up on you from either side.

Reinvent the way you drive with e-Pedal

Imagine having the option to drive with one pedal. With e-Pedal, just press down for an instant rush and ease off to slow down. It's a whole new way to drive that's not only fun, but efficient. It can even help add power back into the battery to help extend range. Of course, your brake pedal is always there when you need it, or flip a switch to return to two-pedal driving.

LEAF

Standard features

Powertrain & Charging equipment

- e-Powertrain with 40kWh lithium-ion battery
- Increased 110kW of power
- Increased 320Nm of torque
- Increased real world driving range of 270km (WLTP)[~]
